- Press and hold the button for 5 seconds to turn your Smart Watch on.
- The home screen of the watch will be displayed.
- From the home screen, swipe to the right to access the menu screen. From here you can tap on any of the function icons to enter the related menu.
- Swipe right on any screen to return to the previous screen.
- The screen will turn off when your Smart Watch is not in use. To wake up the screen press the power button or turn your wrist.
- Wrist gesture control is automatically turned on so that the screen will also wake up when you turn your wrist. This can be turned on/off within the app, or the screen display settings on your watch.

DOWNLOAD AND INSTALL THE APP

- To download the app please search for "SEKONDA SMART" in the app store on your phone.
- Or scan the QR code using your smartphone camera or a QR code reader app.

The SEKONDA SMART app will work on the following smartphones:

- Android (version 7.1 and above)
- Apple iOS (version 12.0 and above)

CONNECT YOUR SMART WATCH TO THE APP

- Open the app and accept the permissions.
- Tap either "Sign In" or "Guest" to continue without creating an account.
- On the next screen you can enter your personal information and goals such as your step count target.
- The app will then prompt to search for devices to connect to.
- Your watch has a unique Bluetooth name beginning with "Sekonda" followed by letters and/or numbers. You can find your watch's Bluetooth name by swiping down from the home screen, tapping on the cog symbol, then going to System > About. Here you will see the Bluetooth name.
- Select the correct Bluetooth name from the list on your phone to connect to your Smart Watch.

- The watch will display the correct time after pairing is successful.

SYNCHRONISE DATA WITH THE APP

- After your watch is paired with the app you can synchronise data that the watch has recorded.
- Please sync your app daily to avoid loss of recorded data. Data on the watch is reset at midnight every day.
- To sync your data, connect to the app. On the home screen, swipe down to sync data with the watch. "Syncing" will be displayed at the top of the page.

- Under "Colour" you can select white or black to change the time/date colour.
- Select whether you would like the time/date to be positioned at the top, bottom, or centre of the dial.
- Tap "Push" to add the dial to your watch.

FUNCTIONS

Swipe right to access the menu. The watch will display a list of the below functions. Scroll up or down and tap to select an option.

Daily Activity - The watch will display the user's total number of steps, the distance walked, and calories burned for the current day. The data will be cleared at midnight every day. You can also access the daily activity screen by swiping left from the home screen.

Sports - In this mode you can select from 8 sports modes to record data during the activity. Data that is recorded can include time, heart rate, steps and calories burned, depending on which activity is selected. Press the button to end the recording of data. Full sports list: running, walking, hiking, exercise bike, treadmill, fitness, football, tennis.

Heart Rate - When this function is selected, the watch will begin to measure your heart rate. The watch will vibrate when it has finished measuring.

Sleep - The watch will display your total sleep time for the previous night, including the total time of deep sleep and light sleep. The watch will measure sleep times between 21:30 – 12:00 the next day.

Blood Pressure - When this is selected, the watch will begin to measure your blood pressure. The watch will vibrate when it has finished measuring.

Blood Oxygen - When this is selected, the watch will begin to measure your blood oxygen. The watch will vibrate when it has finished measuring.

Message - When connected to your phone via Bluetooth, notifications from your phone will be sent to your watch. View new messages/notifications here. Make sure to accept the permissions for push notifications on your phone for this to function correctly.

Weather - After your watch has been connected to the app, it will display local weather information. To update the weather information, synchronise the watch with the app. Please make sure location permissions are turned on within your phone's settings

Female Care - In the app, scroll down on the home screen and tap "Female Care". Enter your details to set up this function. This can then be viewed from your Smart Watch menu. Please choose "female" when setting up your profile for this function to appear.

Stopwatch - Tap the play button to start the stopwatch. Tap the refresh button to return the stopwatch to zero.

Music - With your phone connected via Bluetooth, music can be controlled through the watch interface. The volume of the music playing from your phone can be adjusted through the watch interface.

Find phone - After the watch has been connected to your phone via Bluetooth, selecting this option will cause the phone to vibrate and beep so that it can be easily located.

Setting

CHANGING THE STRAP

- The strap on the Smart Watch is removable and interchangeable with other 16mm watch straps.
- Turn the watch over and locate the quick release as pictured.
- Push the quick release pin away from the watch to separate the strap from the watch.

SAFETY AND CARE INSTRUCTIONS

International Protection Rating (Water Resistance)

Your Smart Watch is IP68 rated, meaning it has complete protection from the ingress of dust, and is protected from continuous immersion in water up to a depth of 1.5metres for a maximum of 30 minutes. Please note that salt water or certain chemicals in water may damage or weaken the watch seals, especially with repeated exposure.

To ensure your watch stays in good functioning condition it is recommended that you:

- Do not press the buttons while your watch is submerged.
- Do not use the watch when swimming, diving, or snorkelling.
- Do not attempt to charge the watch while it is wet.

Please note that the watch's touch screen will not function while submerged in water.

If your watch is exposed to water, always dry it fully with a soft cloth.

If your watch is exposed to any other liquids such as salt water, swimming pool water, soapy water, perfume, sunscreen, hand sanitiser, cosmetics, or other chemical products; wash it with clean water and dry it fully with a soft cloth.

The watch's functionality may be affected if these instructions are not followed.

 Do not attempt to disassemble your Smart Watch. This may cause a safety hazard, could damage your watch, and/or affect the water resistance.

- Do not use hair dryers, blowers, or any other heated equipment to dry your watch
- **Do not** operate your watch near radiators or heat sources. This could cause damage to your watch.
- Do not place heavy objects or exert strong pressure on your Smart Watch.
- Avoid using the watch in extremely high or low temperature environments.
- Avoid using the watch in high humidity environments.
 This could affect the water resistance of the watch.
- Protect your Smart Watch from long exposure to direct sunlight.

Please note that the measurement results of this device are for reference only and are not intended for medical use. Users should always follow the advice of their doctor or other trusted medical professional.

When using your Smart Watch on aeroplanes, in hospitals, or near medical electronic systems please follow the authority standards and be aware that wireless signals transmitted could impact the functionality of sensitive electronics.
